Professional Summary

Front-End Developer with 5+ years' commercial experience building production web applications using React, TypeScript, and Next.js. Strong in component-driven UI, API integration, and delivering maintainable, scalable frontends in PR-reviewed teams. Comfortable improving UI consistency, and applying accessibility-minded practices to ship reliable user experiences. Seeking a fully remote role in Australia.

Technical Skills

- **Frontend:** React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind
- **State & Data Management:** SWR, Tanstack Query, Yup, Zod
- **Backend:** SQL (PostgreSQL, SQLite, MySQL), Relational Database Design, REST API development
- **Tools & Cloud:** Jira, Supabase, Git, Docker, Kubernetes (familiar)

Work Experience

Full Facing (Pty) Ltd. *Cape Town, South Africa*
Senior Frontend Developer *Aug 2021 - Jun 2023*

- **Stack**: Next.js, React, HTML, CSS
- Developed, maintained, and integrated Strapi CMS into a Next.js public facing website, allowing the marketing team to publish articles and edit OpenGraph and JSON linked data for SEO-optimisation.
- Leveraged native html inputs to build custom-styled input fields that were still accessible.
- Utilised Stale while revalidate (SWR) with form management and input validation (Yup) to build large input forms that delivered a fast and reliable user experience and minimised backend queries.
- Helped develop and maintain an API layer for standardised, reliable integration across all frontends.

Frontend Developer *Jun 2018 - Jul 2021*

- Worked in Agile sprints, contributing to planning, and performed daily peer code reviews.
- Assisted with DevOps by maintaining frontend Docker files and debugging deployment issues.
- Contributed to an LMS (Lesson Desk), building and integrating learner content management webpages using Next.js (For example, uploading learner content/media, scheduling quizzes, and viewing results and exporting reports).

IT Dev Intern *Dec 2017 - May 2018*

- Contributed to frontend development projects using React and JavaScript.

Projects & Freelance Work

- **The Grand Collection Guesthouse Website (Freelance Work)** *Jan 2026*
  Stack: Next.js, TypeScript, Tailwind CSS, Payload CMS.
  GitHub Repository | Website
  - Configured a headless CMS (Payload), allowing the client to update page and SEO content.
  - Created article/blog pages with Article and FAQPage structured data to improve SEO and increase eligibility for rich results in Google Search.
  - Uses customised Shadcn UI components.

- Uses ISR (Incremental Static Generation) to benefit from caching, faster page loads, reduced server load, and on-demand revalidation if CMS content is updated and published.

- **GB Chiropractic Website (Freelance Work)** *Sep 2025*
  Stack: Next.js, TypeScript, Tailwind CSS, Payload CMS.
  GitHub Repository | Website
  - Google Lighthouse performance and other scores exceed 90 across all pages
  - Business website for small regional business, SEO-optimised with OpenGraph and Structured Data, blog articles, and targeted keywords.

- **Academic Workload Manager -** Work Integrated Learning Project *Mar 2025 – May 2025*
  Stack: Next.js, TypeScript, Tailwind CSS, MySQL, PHP REST API, Docker
  GitHub Repository – access on request
  - Delivered a real-world, full stack workload allocation tool for a university, used to fairly distribute teaching loads while respecting workload constraints, and facilitating allocation conflict resolution.
  - Leveraged Next.js SSR for secure session management, server-side input validation, and API integration.
  - Designed and implemented a relational database (see entity-relationship diagram).

- **Minesweeper Clone (Community/Personal Project)** *2018 & 2023*
  Stack: TypeScript, HTML, CSS
  GitHub Repository | Play Game
  - 2018: Created Minesweeper as a Hacktober fest project, collaborating with other developers.
  - 2023: Rewrote the game in TypeScript.

Education

Griffith University Gold Coast, QLD, Australia
Master of Information Technology; Major in Software Development & Support *Jul 2023 – Jun 2025*

- Graduated with distinction (6.88 GPA)
- Skills: Full-stack development, database design, secure development, cloud hosting.

Award for Academic Excellence (2023 & 2024)
